

Structural Firefighting Practices

This course is designed to provide firefighters with hands-on practice in basic live firefighting skills. Utilizing a specially built live fire training structure, the firefighter will perform both direct and indirect methods of attack. Nozzle theory will be discussed and demonstrated and the student will be introduced to methods of hose handling as well. Fireground safety procedures are detailed and followed throughout the session. Students are required to bring a full set of NFPA Standard compliant protective clothing to the session.

Prerequisites: All students who attend this program must have previously completed minimum training as required by the Massachusetts Firefighting Academy's Live Burn Policy.
